What if your house suddenly disappeared? Annie Wilson of Dallas Texas came home to an unpleasant surprise. A construction company **had pulled down** her house while she was at work. And it was all a **joke**.

Annie lives next to Jackson State University. At the time, the university wanted to expand. Previously, the university had bought a small piece of land next to Annie's house. Later, they offered Annie \$8,000 for her property, but she didn't want to sell. Nothing happened until some Jackson State students placed signs next to the

house saying "Property of Jackson State". That same day, and completely coincidentally, a contractor came. They demolished her house, thinking it was property of the university.

As you can imagine, Annie didn't think the **prank** was very funny. Now, she is trying to get compensation, and "it's a **nightmare**". She is asking for \$30,000 dollars. She lost everything, including some valuable antique furniture. The students responsible also **face** charges. They may also have to pay Annie for damages. •

THIS IS ANOTHER PART IN OUR SERIES OF FAMOUS NAMES WITH MEANING. MORE NEXT MONTH.

A "seal" is a large animal with flippers that usually lives in colder climates. "The children loved watching the seal balance a ball on its nose."

Alicia Keys (American singer and actress) A "key" is a small instrument used to open locks.

"I lost my keys, so I can't start my car."

A "blur" is a shape or area that you cannot see clearly because it has no distinct outline.

"Out of the corner of my eye, I saw a blur of movement."

Also, a "blurred" picture is one that you cannot see clearly.

No Doubt (American group)

"No doubt" is an expression to say that something seems certain or very likely.

"The scandal will no doubt be all over the news tomorrow."

Russell Brand (British comedian) A "brand" of a product is the version of it made by a particular manufacturer.

"I bought one of the leading brands of toothpaste."

Strawberry Shortcake

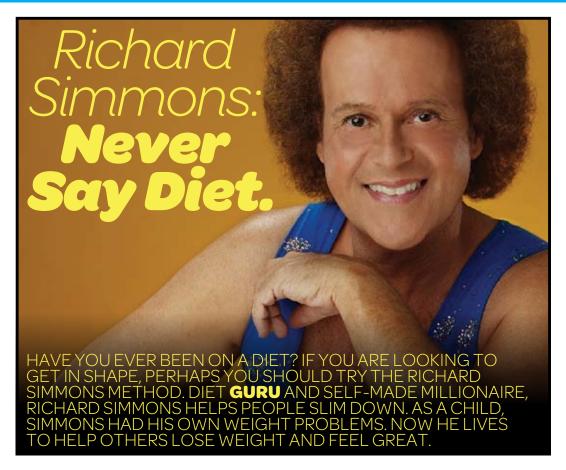

(cartoon character)

A "strawberry" is a small red fruit with tiny seeds on the skin. "Shortcake" is a type of biscuit made from flour, sugar and butter. "Strawberry Shortcake" is a typical American dessert. It consists of a biscuit with strawberries on top. "After dinner, we are going to eat my mum's homemade strawberry shortcake."

Dixie Chicks (American group) "Dixie" is a nickname that refers to the Southeastern United States including states such as Tennessee, Alabama, Mississippi, Georgia, etc.

A "chick" is a baby chicken, but is also a derogatory slang word for a girl or woman. "Remember that chick from the Snapple commercials?

ichard Simmons spent most of his childhood being overweight. By the time he was 18, he weighed more than 130 kilos. On a television interview, Simmons talked about a life-changing experience, "I went inside a store, came back to my car and saw a note. The note said, 'You are killing yourself living like this. Please don't die." Simmons, who afterwards lost 55 kilos, admits that he lost the weight in unhealthy ways. For the future, he wanted to provide desperate dieters with healthier methods.

So, in an effort to present alternative weight loss options, Simmons made a **fitness** videotape series called "Sweatin' to the Oldies." In these workout videos. he wanted "real music", not techno.

On the tapes, he leads exercise routines, and has a band behind him singing dance classics from the 1950s and 1960s. His tapes have sold over 20 million copies. And, more than 20 years later, people still buy them. A satisfied customer says, "He shows you the meaning of 'never give up', and because of Richard Simmons, I feel so much better about myself." Richard Simmons is a man who believes in his products, and who is appreciated by his public.

Practising what he preaches, Richard took his fitness ideology all the way to Washington,

DC. In 2006, he worked on a legislative bill that proposed **mandatory** physical education requirements in American public schools. During this time, he used his personal website as a discussion forum to "Ask America" for help. The bill said that severe weight gain in children can cause depression and diabetes, and that children need at least 150 minutes of physical activity per week. Simmons gained the attention and support of millions of people.

> Aside from his political activism, 60-year-old Richard continues working hard. In addition to television appearances, interviews and marketing his fitness products, he has a weekly radio show called Lighten up with Richard Simmons. Also, he

hosted his 3rd fitness retreat in Beverly Hills at his "safe haven" workout facility "Slimmons". His retreat **itinerary** contains aerobic classes, nutrition seminars and naturally, sweating to some great music. He will do another one next year, as they are now an annual tradition.

Richard Simmons will always be the pioneer of fitness plans. But apart from that, he is a caring and charitable being with a deep devotion to help other people. He shows his passion in all of his products and adds a personal touch to everything he does. •

ichard immons

Born on July 12, 1948 in New Orleans, Louisiana. Simmons is a physical fitness expert, known for his short shorts and high-energy fitness classes. He has earned millions from his weightloss products, especially from the famous "Sweatin' to the Oldies" videotapes. He is still very active in helping people lose weight and

hosts annual nutrition conferences for his

fans. His first job was selling **pralines**. He currently lives alone in Beverly Hills, California.

Confusing Words

IN THIS MONTH'S GRAMMAR FUN SECTION, WE'RE LOOKING AT SOME MORE CONFUSING WORDS.

fun / funny

"Fun" and "funny" are very similar in appearance, but they mean different things.

"Fun" is used to describe something enjoyable. For example:

- a) Playing cards is fun.
- b) I had so much fun last week at the beach.

"Funny", however, has various meanings. It can be used to describe something that is weird or strange. It can also be used to describe something that makes you laugh. For example:

- a) There's something funny (strange) about that man. I don't have a good feeling about him.
- b) There was something funny (out of the ordinary) about Mandy yesterday. I wonder if she has got a new boyfriend.
- c) The joke is funny.
- d) Funny comedians can make you laugh.

See if you notice the difference between "fun" and "funny" in the following dialogue.

- A: What do you like most about your wife?
- B: She is so funny. She always makes me laugh. That's why I love to be around her.
- A: What do you normally do together?
- B: We usually talk, go out to eat or see a movie. We like to travel and see new places. We have a lot of fun together.

shade / shadow

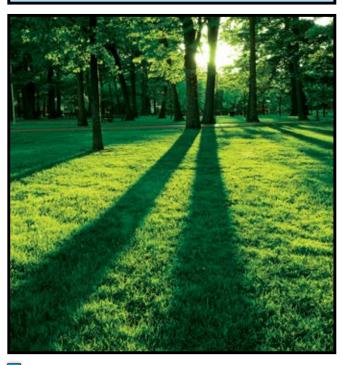

The "shade" is a dark area on a sunny day. You can usually find shade under or next to an object, such as a tree or a building.

For example:

- a) Temperatures are a lot cooler in the shade than
- b) I think I'm getting a sunburn, so I'm going to find some shade.

A "shadow" is a dark shape on a surface that is made when something stands between a light and the surface. For example:

- a) I only saw the shadow of his face.
- b) A maple tree casts a shadow over the grass.
- c) He saw the shadow of the man in the street.

Exercise

Choose the correct answer.

- 1. I feel hot. I am going to go in the shade / shadow.
- 2. The dog's **shade / shadow** looked like a monster.
- 3. Ricky Gervais is such a fun / funny comedian.

Adi Dassler

What happens if your biggest business rival is someone in your family? Two of the biggest sportswear companies in the world, Adidas and Puma, were formed by two brothers in Bavaria, Germany. This is the story of the Dassler family.

It all started in post-World War I Bavaria. At the time, the Dassler family worked together. Adolf "Adi" Dassler, a baker, started making sports shoes. His father worked in a shoe factory, so he helped his son's new business. Other family members also contributed, one of whom was a blacksmith who produced the spikes for running shoes. The business quickly became successful and even equipped Jesse Owens in the 1936 Olympics. But trouble was coming.

In 1924, things began to go wrong. Adi's brother Rudolf joined the business. This only led to competition and complications. The brothers didn't get along at

all. During World War II, there was an incident during an Allied bombing when Adi and Rudolfs' families were in the same bomb shelter. Adi made an angry remark about the Allies, but Rudolf was convinced that Adi was referring to Rudolph's family. Later in the war, Rudolf (who was the more zealous National Socialist) was captured by the Allies. While imprisoned, the brothers bickered, because Rudolf accused Adi of turning him in. Eventually, the war ended, and so did the brothers' relationship. Adi's company became the self-titled Adidas, and Rudolf's company became Puma.

The two separate sportswear companies wanted loyal customers only. As the years continued, their hometown Herzogenaurach split over the issue.

Many visiting workmen carrying out maintenance on Rudolf's house used to deliberately wear Adidas trainers. Whenever Rudolf would see his rival's trainers, the workmen would be ordered to take them off, and then be given a free pair of Pumas. During the 1960 Olympics, a German competitor

attempted to cause controversy by wearing both types of trainers. Olympian runner Armin Hary had won a gold medal wearing Pumas after being an Adidas customer, but later switched back to Adidas. Disgusted with Hary's initial change, Adi banned Hary from using his products. But perhaps the most obvious case of publicity was during the 1970 World Cup Final. At kick-off, Pelé put his foot on a football and tied the shoelaces of his Pumas while the TV cameras watched. He had recently been given \$120,000 in sponsorship from Puma.

Adidas is the larger of the companies, but Puma has recently been expanding. Puma's expansion however, led to a 26% downturn in profits for the year 2006. Adidas has a workforce of approximately 27,000, whereas Puma only has about 7,000. Adidas had a profit of €551 million for the year 2007, and business continues to improve for the company. Adidas will replace Reebok as NBA apparel providers in 2011.

And what would the Dassler brothers say now? Adidas has won the feud easily, but

Puma continues to be successful. Neither company is owned by the Dassler family anymore, but ironically, Adi and Rudolf are buried in the same cemetery. However, considering their life-long rivalry, they are buried as far apart as possible. ©

Frasier

Season 1, Episode 1

Frasier is an American television programme about the life and family of psychiatrist

Dr Frasier Crane. Frasier lasted 11 seasons (1993-2004) and won 37 Emmy Awards.

In this scene, Frasier Crane is talking to his sharp-tongued yet down-to-earth producer Roz.

VIDEO

You Tube

Search YouTube for "Frasier and the Story of Lupe Velez". Starts: 00:34.

The script

Roz: Ever heard of Lupe Vélez?

Frasier: Who?

Roz:

Lupe Vélez, the movie star in the '30s. Well, her career hit the skids, so she decided she'd make one final stab at immortality.

She figured if she couldn't be remembered for her movies.

she'd be remembered for the way she died. And all Lupe wanted was to be remembered. So, she plans this lavish suicide - flowers, candles, silk sheets, white satin gown, full hair and makeup, the works. She takes the **overdose** of pills, lays on the bed, and imagines how beautiful she's going to look on the front page of tomorrow's newspaper. Unfortunately, the pills **don't sit well with** the enchilada combo plate she sadly chose as her last meal. She **stumbles** to the bathroom, trips and goes head-first into the toilet, and that's how they found her.

Frasier: Is there a reason you're telling me this story?

Yes. Even though things may not happen like we Roz:

planned, they can work out anyway.

Frasier: Remind me again how it worked for Lupe, last seen

with her head in the toilet.

All she wanted was to be remembered. Will you ever Roz:

forget that story?

Are you afraid of snakes? Gloria Hurst of Utah is terrified of them. So, she got a nasty shock when she found two snakes in a package. It started when Gloria, 56, ordered some equipment for her hobby, glass blowing. When the box arrived, she opened it and looked inside. At first she thought the snakes were part of the kit. "They looked like **hoses**, and I presumed they were part of the equipment. But then my husband told me to go outside and I knew something was wrong," she said. He took the box outside and called the Division of Wildlife Services. "I opened the

box seven hours after receiving it. And during this time I had my two grandchildren at home with me," she said. So, how did they get in the box? The company who sent the material, Unlimited Oxygen of Mooresville, Indiana, says it was all an accident. "The snakes probably came from a farm near our warehouse. Recent flooding in Indiana may have caused the snakes to look for a dry spot to hide. That's when they found the box," a spokesperson for the company explained. Authorities are considering sending the snakes back to Indiana. 3

■ We Are The World – USA For Africa

We Are The World was written by Michael Jackson and Lionel Richie and released in 1985. It followed Band Aid's Do They Know It's Christmas, and was used to raise money for people in need in Africa. Celebrities such as Stevie Wonder, Diana Ross and Bob Dylan participated, and over 20 million copies were sold worldwide. Over \$60 million dollars was raised.

We are the world, we are the children, We are the ones who make a brighter day, So, lets start giving, There's a choice we're making, We're saving our own lives, Its true we'll make a better day, Just you and me.

2 What a Wonderful World, Louis Armstrong Released in 1967, this song is about the beauty of the world. It was written by Bob Thiele and George David Weiss and topped the charts in the UK. Louis Armstrong's deep, warm voice has made the song an all-time classic. I hear babies crying, I watch them grow, They'll learn much more than I'll never know, And I think to myself what a wonderful world. Alive again, oh you make me feel like I'm alive again.

3 All You Need Is Love,

the Beatles

This song was written by John Lennon and was the UK's contibution to the first live, international TV show Our World., which was broadcast in 1967. With more than 500 million viewers worldwide, the song was an instant hit. The Beatles wanted a song that would speak to everyone, and who doesn't need love?

There's nothing you can make that can't be made, No one you can save that can't be saved, Nothing you can do but you can learn how to be you in time,

It's easy, all you need is love, all you need is love.

4 Survivor, Destiny's Child

This is an **uplifting** song for anyone who has a broken heart. It was released in 2001. The band, which was led by superstar Beyoncé Knowles, **split** in 2006.

I was born this way, Don't hide yourself in regret, Just love yourself and you're set, I'm on the right track, Baby, I was born this way Oh, there ain't no other way, Baby, I was born this way, Baby, I was born this way.

6 Summer Rain, U2

This Irish rockband has been around since 1976, and lead singer Bono is well-known for his charity work, mainly for the poor in Africa. Summer Rain was released in 2000 as part of the album, All that you Can't Leave Behind. It tells us not to be afraid of ourselves and to feel the strength within.

It's not why you're running, It's where you're going, It's not what you're dreaming, But what you're going to do, It's not where you're born, It's where you belong, It's not how weak, But what will make you strong.

7 A Brand New Day, Wizard of Oz

This song featured in the movie *The Wiz* (1978), which was inspired by the musical of the same name. The movie featured superstars such as Michael Jackson and Diana Ross.

Everybody be glad, Cos the sun is shining just for us, Everybody wake up, Into the morning into happiness, Hello, world, It's like a different way of living now, And thank you world, We always knew that we'd be free somehow.

8 That's What Friends Are For, Dionne **Warwick and Friends**

Dionne Warwick was born into a musical family in 1940. She is not only a singer, but also a successful actress and TV-show host. That's What Friends Are For was originally recorded by Rod Stewart for the soundtrack of the movie Night Shift, but became a hit after Warwick covered it in 1985. The song is about the importance of friendship in times of need.

Keep smiling, keep shining, Knowing you can always count on me, For sure, that's what friends are for, For good times and bad times, I'll be on your side forever more, That's what friends are for.

DR FINGERS' GRAMM

Dear Dr Fingers,

I am so confused, because I don't know when to use certain words. I'm really stuck and I need your help.

- 1. How do I know when to say "accept" or "except"? I know they sound more or less the same, but I need to know this for when
- 2. And also, what is the difference between saying "can" and "may"? I mean, which of these sentences is correct?
- a) Can I swim in your pool?
- b) May I swim in your pool?

Thank you so much for your help. I look forward to hearing from you. Signed,

Ms Mixed Up

Dear Ms Mixed Up,

Thanks for writing. You addressed some really important points, and I am very happy to help. Let's start with your first question, the difference between "accept" and "except":

"Accept" is a verb that means "to approve". For example:

- a) We were so happy when she accepted the proposal.
- **b)** The company accepted the plan to build an office in Auckland.

"Except" is most commonly a conjunction, meaning "excluding" or "leaving out".

- a) I don't take any medicine for a cold, except
- b) Except for chicken, Jessica eats all types of meat.

However, "except" is also a verb, and means to "exclude" or "to leave out". It is most often used in formal legal English. For example, "If we except the possession of the murder weapon, the plaintiff still has a chance of winning the trial."

Now, on to your next query.

- a) Can I swim in your pool?
- **b)** May I swim in your pool?

In these sentences, both sentences are correct in that they both ask for permission. While you can say both, "may" is more formal.

However, "can" and "may" have other uses as well. "Can" implies ability. For example:

- a) I can sing very well.
- **b)** Can you run quickly?

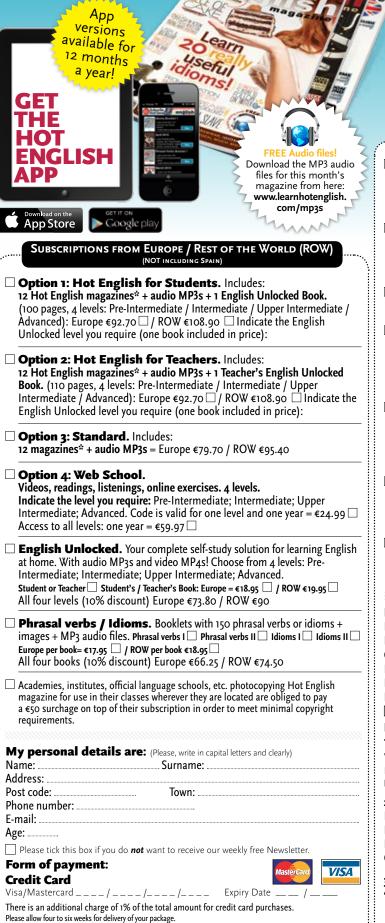

"May" implies possibility. For example:

- a) I haven't decided yet, but I may go to Paris next
- **b)** The stocks may fall if the economy is down.

I hope this helps. Keep the guestions coming, and good luck with your English!

Corny Criminals

HERE'S ANOTHER PART IN OUR SERIES ON GOOD, BAD AND FUNNY CRIMINALS.

Coffee Con Cop demands free coffee.

A policeman in the United States has been sacked for allegedly threatening employees at a Starbucks in Daytona Beach, Florida. Lt.

Major Garvin, who earned in the region of \$80,000-\$90,000 per year, lost his job after employees at the restaurant reported him. Apparently, the officer frequently demanded free coffee; and said that if he didn't get it, the staff at the store

would get a slow response time in the event of "something happening". Staff also said that the officer regularly pushed in front of other customers who were queuing to be served. Garvin's superior said, "I'm embarrassed by this incident because it makes the police look stupid and intimidating. And on top of all that, this guy earns very good money. I know the restaurant is pretty expensive, but this is ridiculous!"

Dog Rules

Police ordered to be more careful with dogs.

"This is political correctness gone mad," said a police officer when he heard about new regulations regarding the handling of police dogs. In a new initiative, police have been ordered to be more careful when controlling their dogs around criminals. New regulations say that officers should also consider whether suspects have allergies or if they have phobias regarding dogs. In addition, they were told to make sure the dogs don't **scare** anyone unnecessarily.

Police officers are **outraged** as they say it will make them look ridiculous during a drugs bust, for instance. One officer said, "The traditional shout of, 'Stand still or I'll set the dog on you', will now become, 'Excuse me, my dog might frighten you a bit. Is that OK with you?"

Apparently, the guidelines have been introduced to ensure that the police force can't be sued. One officer compared the situation to not sending a criminal to prison because they might be claustrophobic. ©

Morld of Differer

THERE ARE MILLIONS OF CHARITABLE ORGANISATIONS ALL OVER THE WORLD. HOWEVER, THIS MONTH WE HAVE CHOSEN TO **HIGHLIGHT** TWO VERY DIFFERENT NON-PROFIT GROUPS THAT MAKE A WORLD OF DIFFERENCE.

3 continents, one goal: to fight poverty and injustice.

History

The name OXFAM comes from the Oxford Committee for Famine Relief, which was founded in 1942. During WWII, they sent food to **starving** women and children. After the war, they opened up second-hand shops.

People donated to these shops by giving items such as false teeth and stuffed animals. OXFAM is known throughout

the world and many celebrities (including the former members of the Beatles) support them publicly.

Typical things they do

OXFAM attacks poverty from three different angles: Campaigning for Change, Development Work and Emergency Response. The organisation places their workers in developing countries, so that **impoverished** people can get immediate help. OXFAM has also helped decrease **debt** in developing countries. They are also modifying the rules for world trade. The organisation speaks with government officials and **lobbies for** things such as workers' rights and fairer and more universal cotton prices. Many people depend on OXFAM when disaster strikes. OXFAM was the first to lend aid when the tsunami hit in 2004.

Ground-breaking project

In 2007, OXFAM was part of a historic deal between the Ethiopian government and Starbucks. The coffee giant

was using Ethiopia's coffee beans, and not allowing the country to trademark the names of the most popular beans. This meant Ethiopia was missing out on an opportunity to earn a lot of money. OXFAM campaigned so that the Ethiopian coffee farmers

could get more money from selling their coffee beans. One of OXFAM's objectives is to **eliminate** poverty and equalise the world's standard of living. •

MARCH OF DIMES

Prematurity: The big picture.

Mission

The March of Dimes aims to improve the health of babies. They work hard to prevent birth defects, low birth weight and premature births. The March of Dimes conducts research for these causes and promotes healthy living for pregnant women.

From one organisation to another

When it was founded in the 1930s, the

March of Dimes was called The National Foundation for Infantile Paralysis. Originally, they worked to prevent **polio**. The organisation wrote columns in the newspaper asking everyone in the United States to donate a dime (10 cents) to polio. Shortly after, the organisation changed its name to The March of Dimes. Once the vaccines were developed to cure polio, the organisation changed its focus to help mothers and babies.

Prematurity Campaign

The Prematurity Campaign is a multimillion dollar project to educate pregnant women to have healthier babies. For every 10 premature births, 4 of them are a result of unknown causes. The campaign focuses on funding more research to learn why preterm births occur.

In 2006, thanks to the campaign, Congress and the US President signed the **Preemie** Act. This act authorises an increased amount of national support from the government.

Charity can be global, national or even local. But regardless of the scale, anyone can contribute. 3

It's a Bira The possibility of invisibility.

ow would you like to be able to make yourself invisible? What would you do with that kind of power? Well, you might be able to find out soon.

The possibility of human invisibility is aetting closer.

Due to research carried out at the University of California at Berkeley, scientists have invented a type of material that reverses light, which

therefore causes invisibility. The method has recently been published in the renowned journals Nature IT'S MAGIC! and Science. is based on simple

The method concepts, and hopefully will only be used with good

intentions.

Although the method isn't found in the natural world, it is similar to the way light bends when you look in water. If, for example, you see a fish in water, its actual position is slightly different than where you see it. The light bends at an angle, thus showing an **empty** area. However, the fish is in that "empty" area. The research is still at an early phase, though the possibilities are exciting. But they could also lead to danger, as criminals get their hands on the technology and use it for

bank robberies or worse.

The idea of invisibility has been around for many years and is a favourite subject of Hollywood. For instance, The Invisible Man films were

released in the 1930s and 1940s. Later in the 1960s, the concept of invisibility was introduced by **Star Trek*** when they made entire spaceships disappear. More recently, the Harry Potter films have depicted magic invisibility cloaks. So, how long will it be before this futuristic vision becomes a reality? •

Star Trek*

Star Trek is a science fiction television series that was on television for three seasons from 1966-1969. It was created by Gene Roddenberry. The programme takes place in the 23rd century and is about the adventures of a star ship and the characters inside. The crew of the star ship includes Captain Kirk (William Shatner), Dr Spock and the medical officer Leonard McCoy. They are focused on exploring space and the galaxy and to "boldly go where no man has gone before".

Cloaking devices are important subjects in the programme especially for the feared Klingons. In the series, Klingons use a cloaking device as a form of technology that can hide an entire spaceship from vision. Having the power of invisibility makes it easier for the Klingons to cause trouble for humans.

FILMREVIEW: QUANTAM OF SOLACE

here are two Bond Girls in this film. The first is Camille, played by Ukrainian actress Olga Kurylenko, a Russian-Bolivian agent. Camille is initially an enemy of Bond and also has a **vendetta** against the film's villain,

Dominic Greene. Bond will seemingly have to cooperate with his new female enemy. The second lady in the film is Agent Fields, played by Gemma Arterton. Fields works at the British Consulate in Bolivia, but is actually an MI6 operative.

Both actresses worked very hard to perfect their roles. In the case of Olga Kurylenko, she was afraid of doing

stunts. Despite her fear, she

underwent several weeks of weapons training and indoor skydiving, during which Daniel Craig helped her. Gemma Arterton was selected for her wit and says that her character isn't "frolicsome" like some of the other Bond Girls. Arterton says that her character is a homage to the Bond Girls of the 1960s, especially Diana Rigg who appeared in On Her Majesty's Secret

he second James Bond **flick** starring
Daniel Craig as 007 was Quantam of
Solace. It also stars Ukranian actress and
model Olga Kurylenko and English actress
Gemma Arterton as the Bond Girls. Quantam of
Solace has got the **character-driven** formula that
works well.

Quantum of Solace shares the name of a short story by Bond creator lan Fleming, but the two are totally unrelated. The movie's plot was created by the film's producer Michael G. Wilson during the shooting of Casino Royale. The story begins with a car chase about an hour after the end of Casino Royale. After the chase, villain Mr White reveals that Quantum, a **shadowy** terrorist group, has infiltrated the British government and the CIA. Bond's search for a double agent leads him to Haiti. There, he **joins forces** with Camille, a Russian-Bolivian spy. The two learn from their investigation that Quantum has a **dastardly plot**. Pretending to be an eco-friendly corporation, Quantum plans

to take control of Bolivia's water supply. Our hero also has to deal with emotional problems stemming from his wife's betrayal and her death in Casino Royale. Can our flawed hero and his sexy sidekick save the South American country? And can he control his desire for revenge?

The Daniel Craig era of Bond films is quite different from previous eras. Whereas the films that preceded his time focused on **gadgets** and girls, *Casino Royale* and *Quantum of Solace* concentrate on the character of James Bond. He is no longer an all-knowing super-agent. He has flaws, emotional issues and a desire for vengeance. One thing hasn't changed, though. James Bond is as exciting a character as ever, and is sure to leave us "shaken and stirred*". \odot

A LOT OF THE MAGIC OF THE JAMES BOND MOVIES COMES FROM THE UNIQUE AND EXOTIC CONTENT. THIS INCLUDES BAD GUYS, **FEMME FATALES** AND COOL MACHINES. HERE'S A MORE IN-DEPTH LOOK INTO THE HISTORY OF THE JAMES BOND FILMS.

Goons and Supervillains

ond has **encountered** his share of evil, but one of his most memorable adversaries is Jaws, played by Richard Kiel. Jaws is over two metres tall and battled with Roger Moore's Bond in The Spy Who Loved Me and Moonraker. He is an unstoppable, steel-toothed

killing machine and often finishes off his enemies by biting through their throats. Jaws has survived all kinds of dangerous situations, including falling several thousand metres from a plane into a circus tent. He has even survived a crash into a fish tank that contained a shark. In Moonraker, he turns good, and even gets a girlfriend.

They float off into the cosmos together in a spaceship, to live happily ever after.

Goldfinger (Gert Fröbe) was another great villain. He is helped by several others, including his Korean bodyguard, Oddjob. Goldfinger's role involved making the gold supply at Fort Knox radioactive, which ended up devaluing

it. Consequently, his own gold would become more valuable, and the Chinese would have more power in the west. In one scene, Bond (Sean Connery this time) is tied up, and asks Goldfinger if he expects information from him. Goldfinger replies, "I don't expect you to talk, I expect you to die!" Goldfinger then directs a laser at our hero. But of course, supercool Bond doesn't die that easily.

Bond has faced off with some worthy opponents, but British actor Christopher Lee remains the king of movie villains. Lee's character Scaramanga had his turn fighting Bond in The Man with the Golden Gun. Scaramanga is a **top-class** contract killer who is attempting to acquire solar energy

technology to further his own interests. As a hitman, he only uses a golden gun with golden bullets, and has worked for both the Mafia and KGB. The climax of the film is a **duel** between our hero and the villain.

Ernst Blofeld was a recurring villain in the Bond series and was played by several actors. Blofeld, as played by Donald Pleasance, was the inspiration for Dr Evil in the Austin Powers films.

Blofeld is seen frequently stroking a white cat.

There have been so many memorable villains throughout the Bond franchise. It is a role that greatly **enhances** an

actor's career, and many Bond villains have become famous. Some of these include Christopher Walken, Robert Carlyle and Telly Savalas. The latest villain is **pseudo**-environmentalist Dominic Greene, played by Mathieu Amalric. These villains keep Bond sharp, and present an ongoing duel between good and evil.

Bond Gals*

ames Bond is a notorious womaniser, so perhaps it is strange that none of his villains have been feminists. As with the villains, there have been many memorable performances from Bond girls. They have come from exotic places such as Russia, South America and China. Here's just a few.

Diana Rigg plays Bond's wife Tracy in On Her Majesty's Secret Service. She has a very classic 1960's look in the film, which made Diana Rigg herself an icon of the time. Tracy has been the only Bond girl to marry Bond, and was

killed on their wedding day by the villain Blofeld. Bond hunts Blofeld down in the subsequent film Diamonds are Forever and takes his revenge.

Holly Goodhead is a clever Bond girl in Moonraker. She helps Bond do battle with villain Hugo Drax and his superstrong **henchman** Jaws. She has been the most intelligent of the Bond girls yet. An astrophysicist, Holly was trained by NASA and worked for the

CIA. In the film, she **goes undercover** in Drax's organization. When Bond discovers this, she is initially unwilling to cooperate with him. However, they eventually team up to defeat the bad guys, joined by the

former villain Jaws.

Wai Lin (played by Michelle Yeoh) appears in Tomorrow Never Dies alongside Pierce Brosnan's Bond. She is a Chinese intelligence agent

investigating a plot to incite war between the UK and China. Bond investigates this as well, but on behalf of the British. They have been ordered to kill each other, but are forced to work together. She also rejected his romantic advances. That was quite an accomplishment, considering James Bond has an irresistible charm.

Vesper Lynd appears in two films with James Bond. The first is a comedy **spoof** of the film series. She is played by Ursula Andress in the original film and Eva Green in the second. Both films are

called Casino Royale. In the second film, Bond falls in love with Vesper. She works for MI6, but Bond later discovers she is a double agent for the Soviets. In the end, Bond learns she was

a Soviet spy against her will. Lynd becomes overwhelmed with auilt and decides to fall on her **own sword**. But she does this too late, and Bond renounces her as a traitor.

Bond girls have always added spice and romance to the series. They are generally portrayed as clever and independent with a knack for fighting. But remember, James Bond is always the boss.

Gadgets

ambling man Bond always has an ace up his sleeve, which is usually a piece of innovative technology. The king of spies has had some memorable gadgets including flame-throwing **bagpipes** and exploding cigarette lighters. Q

is the brains behind these life-saving contraptions. Q, (Quartermaster), presents Bond with very modern and unusual contraptions. Bond has his trademark Walther PPK handgun but is also known for many other

special gizmos. In Goldfinger, Bond drives an Aston Martin DB5 fitted with revolving license plates and tyreslashing **hubcaps**. There is also an ejector seat

on the passenger side and the car has oil slick and smokescreen

capabilities. It also has machine guns fitted to the front. Bond also uses a wetsuit fitted

The Man with the Golden Gun featured many gadgets used by both Bond and villain Scaramanga. Scaramanga's golden gun had many functions, including a pen, a cigarette lighter, a

cigarette case and a **cufflink**. The bullets were also made of gold. Scaramanga even had a flying car, but Bond had a tracking device to keep tabs on it.

Casino Royale featured more realistic gadgets, but they were just as deadly. Much of the technology in the recent James Bond movies consists of products that are available to consumers. This certainly makes the series more

believable. An exploding keychain is used in an attempt to bomb an aeroplane. Bond has ultramodern mobile phones with GPS systems and a microchip implant so that MI6 always know where he is. While O isn't featured in Casino Royale or Quantum of Solace, it seems as though the fascination continues with James Bond's technology. •

THIS MONTH WE AREN'T LOOKING AT TWO PEOPLE, BUT TWO FORCES IN THE GREATEST BATTLE OF THEM ALL. THEY ARE, OF COURSE, THOSE TWO **MIGHTY** ENERGIES WITHOUT SHAPE OR FORM: GOOD AND EVIL.

Evil has an immediate upper hand. It doesn't have a code of ethics that it isn't allowed to break. If you're evil, you can do whatever you want; anything goes. Evil people have been among the most powerful in history. Hitler, Pol Pot and Julius Caesar have each had the lives of millions of people at their mercy. They, much like all-powerful dictators, have shaped the world in their own graven image and changed the course of history.

Good, on the other hand, has a more difficult battle to fight. Good people have a tendency to die young, often murdered by evil people. People such as Jesus, John Lennon or Pope John Paul I died relatively young. In the case of the first two, they were murdered. In the case of John Paul I, there is suspicion surrounding his death. Each had a message of peace and

also battled corruption. The problem is that good people have **boundaries** that they can't cross and rules that they must follow.

In the world of cinema, many films have an underlying theme of the battle between good and evil. Generally, each "good and evil" film has more or less the same format. Evil will quickly gain the upper hand, killing and causing misery before the good guys begin to work together to fight back. For example, the books and films of The Lord of the Rings tell the story of how the owner of a magic ring possesses great power. But the owner can't use the ring for good, and eventually falls under the power of the evil dark lord Sauron. The good guy's only hope is to destroy a ring that wields too much power.

There's really no competition

here. Evil only wins in the short-run. Evil doesn't have rules to follow so it always has the upper hand. Evil people don't have ethics or regulations to live by, so they soon end up turning against their comrades. Eventually, the dark army of the night will collapse because its goals are selfish and individualistic. Evil people want more than everyone else, and they're prepared to do anything to get it.

On the other hand, people who are good try to help their friends when there is trouble. They also think about what is best for people collectively and put the interests of others above their own. If everyone does this, everyone wins. But if everyone is evil and selfish, societies and civilisations will quickly collapse inwardly and destroy themselves. So therefore, our results are: Good = 10 / 10; Evil = 6 / 10.

Born: 19th May 1925. Died: 15th April 1998. Saloth Sar was the leader of the Khmer Rouge, an ultra-Maoist movement in Cambodia. After the Khmer Rouge overthrew the government of that country, they imposed a reign of terror from 1975 to 1979. They renamed the country Kampuchea and evacuated entire cities. They planned to rebuild civilization as totally agricultural. From a population of seven million, it is said that approximately 1.8 million people died, although the figure could be higher. The killing only ended when Vietnam invaded Cambodia and overthrew the Khmer Rouge.

ased on the bestselling novel of the same name, The Boy in the Striped Pyjamas was written and directed by Mark Herman. Set during Hitler's **regime**, the plot is about an 8-yearold's perspective of the Holocaust.

The story begins with 8-year-old Bruno. He is very upset that his family is moving, and that he will be torn away from his comfortable life and five-storey house in Berlin. His father is a commandant at a concentration camp, and so the rest of Bruno's family must live near

Auschwitz. Bruno feels lonely, but finds a friend who lives on the other side of the concentration camp fence. The two children discover they were born on the same day, and that they have similar interests. However, as the film progresses, Bruno starts to understand what is happening around him.

Both Herman and novelist John Boyne wanted to personalise the Holocaust. They hope people will view the story as a historic tragedy rather than a museum. While the subject matter is serious, it isn't as brutal as what you might expect from a film about the Holocaust. The novel has been selling millions of copies around the world, so it is obvious that the issues in the book and the film are still relevant today. • and has written six novels so far. His most

famous work, The Boy in the Striped Pyjamas, has sold more than 3 billion copies and has been translated into 35 languages. He studied English at Trinity College, and later pursued Creative Writing at the University of East Anglia. Currently, he lives in Dublin.

Dead Men Walking is one of the many films about the war in Northern Ireland. It is a more personal

tale, based on the book of the same name by Belfast-born Martin McGartland. The film stars Jim Sturgess as McGartland and Ben Kingsley as his handler. McGartland was an agent within the IRA for the British police. The film's plot revolves around his

double life.

A twenty-two year-old Marty is a young **hood** from West Belfast. He joins the IRA at the request

of the British police. Marty has sympathies towards Irish republicanism, but doesn't

like the **Provos'** methods. But once he gets accustomed to his powerful position, he forgets about his sympathies. As events unfold, Marty gets used to the rush that his dangerous career

provides. Nobody, not even the mother of his children, knows the truth about his job as a tout.

This film raises some larger issues about the war in Northern Ireland. Can the British be trusted? Is Marty just a **pawn** in a much bigger game of killing and revenge? And what **lies ahead** for the young man and his family if the IRA **find out**? *Fifty Dead Men* Walking is a real-life story about one of the **murkiest** parts of war: the war of spying and espionage.

The film was made with Martin McGartland's help, but he disagreed with the final product. He objected to parts of the film that never happened, and

the consultation process that involved former IRA members. Despite this, he later agreed to a settlement which included a payment of approximately £20,000. 🗘

Fifty Dead Men Walking star Rose McGowan has caused controversy by expressing support for the IRA's cause. She said that, if she were from Belfast, she would be "100% in the IRA". The Hollywood actress said that violence wasn't an answer to problems, but it was understandable. Her comments were condemned by Martin McGartland and several leading **Unionists**.

nformers: Victims or Pariahs? Tales of a dirty war.

Are the motives for informing so black and white? Is everyone in favour of the state authorities, or are some people threatened and forced into co-operating? A lot of people who hated the British occupation changed sides during the war in Northern Ireland. But why?

During that time, many cases of informers and double agents were reported. Martin McGartland's case (talked about in the film) involved a voluntary willingness to help the British authorities. One example of state coercion, however, was the case of Denis Donaldson. Apparently, Donaldson was **blackmailed** into cooperating after "compromising himself". It was never revealed how he compromised himself, but he ended up being **ostracised** by people in his community. Denis Donaldson was a highranking member of Sinn Féin and a former IRA member. It was all the more shocking as Donaldson was a close friend of republican

icon Bobby Sands. The most famous picture of Sands showed Donaldson standing right beside him while in prison. Denis Donaldson was murdered in April 2006 by unknown assassins.

Another example of the "dirty war" was the case of Freddie Scappaticci. In 2003, a member of British Army Intelligence announced that Scappaticci was "Stakeknife". Stakeknife was a codename given to a highlevel British agent in the IRA. At least one innocent civilian was murdered by Loyalist killers to protect this person's identity from Republicans. Scappaticci denied being Stakeknife. The IRA says that it believes him, adding that the story may just be "dirty tricks". Freddie Scappaticci was allegedly the leader of the "nutting squad", an IRA unit used to search for and kill informers. It was never explained how or why "Stakeknife" became an agent.

There are countless other cases of double agents and informers. Suspiciously enough, many have never been discovered.

Passengers on the flight complained that the man was spending too much time in the toilet. An air attendant knocked on the door, and

then noticed water coming out from underneath it. "We had to open the door with a key, and saw that the man was half naked," she explained. In his defence, the passenger, John Walsing, said it was his first

time on a plane. "I discovered the bathroom had hot water, so I thought of taking a bath, since I hadn't had one for a couple of days," he explained. The airline could not punish or charge the man as there is nothing in the regulations to prohibit passengers from having a mid-flight bath. 0

f course you know how to catch a bus. But if you ever need assistance, a leading British bus company has come up with a guide on how to catch one. The guide begins, "Using the bus could not be easier." And continues, "Passengers should first decide what bus they need. Once the right bus has been spotted, with the number and destination on the front, one should then signal for the driver to stop. Wait until the bus is stopped and the doors are fully opened

and step on board. When you want to get off, press the **bell** once. For your safety we recommend you remain seated until the bus has arrived at the stop."

A spokesperson for the company said research had shown that many members of the public no longer know how to use public transport. "If we look back 30 or 40 years, catching a bus was part of our daily routine from when we were children. But that's all changed now with so many cars on the road."

Celebrity memorabilia for sale.

Have you ever wondered what happens to rock-and-roll celebrity memorabilia? In an auction in London once some very special belongings were sold.

The most popular item

at the event was Jimi Hendrix's legendary guitar. It was auctioned off for a whopping £322,000. This was his most famous guitar, which he set alight at a concert in London. He burned his quitar in a now classic concert, held in the Finsbury Astoria Theatre in 1967. This event, which was caught on camera, has become an iconic image of the guitar maestro. The Fame Bureau, specialist auctioneers for rock-and-roll memorabilia. said that Hendrix's Fender Stratocaster was bought by an American collector and dealer.

Also at the London auction, which was attended by members of Thin Lizzy and The Clash, were pieces of memorabilia from other stars. An application from Elvis to the State of California for a

concealed gun permit was sold for over £50,000. But a grand piano, which The Beatles used to record the song Hey Jude, failed to find a buyer. This item was expected to **fetch** in the region of £300,000.

All in all, the auction had some renowned and unique memorabilia and earned a lot of money. It just shows that the current economic crisis hasn't lessened the enthusiasm of some rock 'n' roll fans. 0

WORD OF THE MONTH

WICKFD

THIS MONTH WE'RE LOOKING AT THE WORD "WICKED" AND HOW IT'S USED IN YOUTH CULTURE. THE WORD USED TO BE JUST ANOTHER WAY OF SAYING EVIL, BUT HOW IS IT USED

NOWADAYS?

n its correct definition, "wicked" refers to someone or something bad or malevolent. The word is quite antiquated these days, and it can sound strange when used in conversation. In Britain, it has been resurrected by youth culture, although it is occasionally used in America. In the 1980s. English comedian Lenny Henry used it a lot in his comedy acts. His character Delbert Wilkins, a supercool DJ, had a car which he named the "Ford Wicked".

In this case, "wicked" is used in a similar way to the word "cool", which means very fashionable or very good. Here are some examples of the word used in this way:

a) I saw a wicked movie last night. I'm definitely buying it when it comes out on

DVD.

b) Liverpool signed a wicked midfielder from Barcelona during

the transfer window.

c) I bought my brother a wicked pair of shoes for his birthday.

It can also be used on its own as an exclamation to express happiness in a situation. For example:

Employee A: The boss says

that our work has been very good this year, so we're getting a pay rise.

Employee B: Wicked!

"Wicked" can also mean that someone is mischievous, but in a fun and playful way that is enjoyable to others. For example, "The comic had a wicked sense of humour."

Another way of using the word is as a slang term or as a negative quantifier. For example, in the US comedy series Malcolm in the Middle, Malcolm talks to a **goth**. He mentions what he believes are the words written on the gates of Hell. The goth then replies, "Wow, that's wicked

"Wicked" is another one of those old words that has been revised and is now used in a modern way. As you can see, not every generation uses words the same way. How "wicked" is that? 🗯

AIRPORT DRAMA @ TRACK 06 @

Interviewer: Welcome to today's edition of Travellers

Digest. Here in the studio we have television critic, Peter Wallace. He's here to discuss the popular travel reality show: Airport (UK). So,

what's the appeal?

Peter: Well, first of all, for just those

> listeners who haven't seen the show, let me explain the principle behind the show. Airport (UK) is a reality show set in an airport. It gives you an idea of what no-frills airlines have to put up with on a day-to-day basis. You see passengers experience all types of travelling nightmares: losing luggage, delays, overbooking, getting

Interviewer: So, why do people like it? Peter: Well, people love to hear

on the wrong flight...

about other people's misfortunes, and people love

drama. And this show's got

lots of it.

Interviewer: Yes, I can imagine.

Peter: That's the genius behind the programme and what makes

it so popular.

Interviewer: So, do you have a favourite

episode?

Peter: Well, they're all very

> entertaining really. It depends on the passengers. Some get very cross, shout and even become quite violent. I remember there was one passenger who'd forgotten his passport. Of course the check-in staff told him there was no way he could get

on the flight, but he simply

refused to listen.

Interviewer: So, what happened?

Peter: Well, as I said, he insisted he was going to catch that flight.

> You see, he had a wedding in Scotland and he was the best man. He was desperate. In the end, the airport told him that his only option was to go

home and get it.

And did he? Interviewer:

Yes, and that's when the real Peter:

drama started as the chase was on. Luckily, he didn't live too far from the airport. So, he raced home and got back just in the nick of time!

Interviewer: Wow! So, it was a happy

ending?

Yes, and that's another Peter:

> reason viewers like this programme. We love seeing disaster but then we like to see that it's all OK in the end.

TELEPHONE ENGLISH @ TRACK 07 @

you?

Max: Yes, hi, I'd like to make a

reservation for dinner tonight for five people at 8:00.

Max: Max Sedaris.

Could you spell the last **Hostess:**

SUE CRAZY @ TRACK 12 @

Interviewer: Good morning, and welcome

to DayTime News. Today, we're discussing legal matters. In the studio today we have Dan Dillon who's here to talk to us about a few of the most ludicrous court cases from recent years. So,

Dan, we're all ears.

Dan: Well, my research has been most interesting. As you know, Americans are never

afraid to stand up for their rights, but these stories really

do take the biscuit. Interviewer: Any favourites?

Dan: Well, actually there was one

> that I found particularly amusing. It involves a middle-aged gentleman called Norman Cake, a 178-cm, 123-kilo New Yorker. He filed a lawsuit claiming that he'd been forced to eat in fast food

restaurants four or five times

per week.

Interviewer: But on what grounds was he

suing?

Dan: Well, Norman Cake is obese,

> diabetic and suffers from heart disease. He claimed that these fast food chains were profiting from his poor health and weren't warning him that the food they were

serving was harmful.

Interviewer: That's ludicrous. What did he

expect? A banner outside the restaurant advising clients

not to eat there?

Dan: Who knows? But he filed a

> lawsuit against McDonald's, Burger King, Wendy's and

KFC.

Interviewer: Which begs the question...

did he win?

Dan: No! The judge dismissed the

case and barred it from being

filed a third time.

Interviewer: Well, Mr Cake isn't the only

> one, is he? There have been lots of attempts in the past to make a quick buck this way and some actually win. I remember there was a case of the woman who sued McDonalds. She'd bought a coffee to take away and burnt

herself holding it.

Dan: Well, yes. People will continue trying. The question is, has

Mr Cake really stopped eating in the restaurants he tried to

sue? I suspect not!

A BIG CHANGE @ TRACK 17 @

Interviewer: Hi, and welcome to the

show. Today in the studio we have travel writer Margaret Goodman. She's here to tell us about her experience as an ex-pat in the South of France. Welcome, Margaret. Thank

you for coming in today.

Margaret: Thank you for inviting me. Interviewer: So, tell us, what made you

move across the channel?

Margaret: Well, I'd always holidayed in

Well, I'd always holidayed in France and was quite familiar with the country. We used to go camping in the Dordogne every year as a family. I loved the French villages in that region of France. The patisseries, boulangeries, the countryside, the culture of wining and dining all fresco

nest, so to speak, I decided to make the move over there permanently. So, my husband and I, we bought a house,

packed up our things and drove over to France. I'm David:

anywhere in the world.
Interesting. So, was it
difficult to adapt when you
first arrived? Holidaying
somewhere isn't quite the

lucky as my job as a writer

gives me the freedom to work

same as living there.

Margaret: Of course not. It took me

Interviewer:

a while to adjust, yes. You have to get used to many things. There are certain ways of doing things here that are different, different social codes that you have to decode, not to mention the language. Integrating is an

important part of the process.

Interviewer: And do you feel part of the

community now?

Margaret: Generally speaking, yes. It's a

small village, so it's difficult to avoid people. I have made some friends, so, of course, people know who I am. I am much their "petite Anglaise" – a term I rather like as it makes me sound "young", even though I am not, and "petite" really means "little".

Interviewer: Any plans to move back?

Margaret: Not for now. My husband and

I want to stay, and, besides, I haven't finished writing about

France. I could go on

forever!

Interviewer: Well, we could go on forever

too, but we really must stop there. Thank you so much

Margaret.

BUSINESS ETHICS @ TRACK 22 @

Interviewer: Welcome to the weekly

programme, Business Ethics. Today, we're talking to business consultant, David Goodman. He's here to tell us all about negotiating.

Thanks, David, for taking time out to speak to us today.

David: My pleasure.

Interviewer: Now, as I understand it,

you've done extensive research on business tactics and written some articles and a book too. What inspired

you?

David: Well, it all started at a time in

my life when I was very active in business. A significant part of my work was taken up with negotiating. Sometimes I got the results I wanted and, of course, there were times when I walked away frustrated and disappointed that I hadn't achieved what I'd set out to get. It made me think about the process of negotiating and getting the

desired results.

Interviewer: So, you started co

ewer: So, you started compiling data to help others, didn't

you?

David: Yes. That's right. There was a

moment of revelation when I realised that my experiences could be valuable for others. So, I started writing things down. Of course, I wouldn't

figured it all out.

Interviewer: Well, they do say you never stop learning, don't they? So,

what did you learn?

go as far to say that I've

David: That I often made some very

in life, you sometimes get caught up in the details and overlook the most obvious and crucial aspects. In my case, it was preparation. There were times when I

basic errors. As with anything

simply hadn't planned and therefore wasn't equipped to deal with the negotiation.

Interviewer: Ohhh, interesting. Now,

tell me about some of your negotiating tactics. Are any of

them... dishonest?

David: There are some dirty tricks, of

course, but that's the nature of business. You don't always know what or who you are

dealing with!

Interviewer: Any tricks you can share with

our listeners?

David: No, that would be telling! No,

seriously, I would say that above all, you have to be a

champion listener.

Interviewer: Well, that sounds easy!

David:

Yes, but you'd be surprised how many of us just don't

listen. So much of successful negotiating comes as a result of great listening. People often tell you a lot about themselves as they're talking – about what they want, what

they need and what they'd like. The problem is that we just don't hear them because we're so caught up in our own thoughts. When you take

time to listen to people they'll tell you about their positions, problems, qualities, likes

and dislikes. And, you don't even have to ask them. For example, listen out for any

sense of urgency to close the deal. That's key information. We were given two ears and

one mouth. And the best thing we can do is use them in that ratio: twice as much

listening as talking. Right, very wise words.

Unfortunately we are going to have to stop there. Thanks

again.

David: Thank you.
